

Hi there!

Have you ever wanted to block TikTok on your kid's phone with the tap of a single button? Say goodbye to hearing echoes of "Renegade" deep in your sleep and say hello to our [new web filtering feature](#)! We heard you loud and clear when you said sometimes you don't want to block *all* social media, but just toggle off the handful of apps you're really worried about – like Snapchat or Reddit. Well, we did the thing, and we're glad to say it's live! (You're welcome). So start off your new week armed with the knowledge that you no longer have to ask your child 578 times to stop scrolling through Instagram before they finally do.

### Caroline's Weekly Snapshot

Here's how Caroline has been spending their time online, and what we've detected on their accounts.

### Fun Facts About 9-Year-Olds

Does your 9-year-old like dressing up like Spiderman or Elsa? Moths are incredibly good at mimicking other objects – including bird poop – as a form of camouflage!

## Bark's Week by the Numbers

The Bark team is proud to serve over 5.2 million kids. Here are some of our stats from last week:
